Superior Architecture

THE HIGHEST STANDARDS

The craftsmen working on our homes are a select group considered the best in their respective areas. Many of them have been with us as far back as the 1970s and 1980s.

Typical features of a Larry Good custom home include energy efficient windows, 5 Star Energy Rating and high efficiency heat and cooling systems, custom cabinetry, marble vanity tops, hardwood floors, granite and quartz countertops. We will include as many amenities as the client desires.

"One of the joys of building this new home was being able to watch the craftsmen at work. Their attention to detail and thoroughness was unfailing." John & Pam H.

TESTIMONIALS

"From the moment we walked into the Larry Good Homes' Plainfield model, we were sold! Their standard material quality far exceeded the multiple-upgraded product of other builders. During the design process, the team listened to our suggestions and designed a home for our family's changing needs. Building a home long distance could have been a nightmare - But NOT with Larry Good Homes! Their team of professionals and craftsmen partnered with us every step of the way. All of the craftsmen are top-notch! Ideas or solutions were communicated quickly through email, photos or phone calls. Our home was delivered on time! After the keys were in our hands, Brian Good and the Larry Good team continue to stand by their product. We are truly excited to start this new chapter living in our Larry Good Home."
Gail K.

"The process of building a new home was painless: Actually it was most enjoyable. The entire staff was a pleasure to work with. The incredible sense of organization and meticulous attention to detail were impressive. I never really worried about how things were going to work out as I learned to have complete trust in you. All of the subcontractors were very good to work with. I appreciate their helpful attitude amid a few changes that we made. Thanks to everyone at Larry Good Homes!"
